

How do I know I'm getting what is advertised?

The performance results of the Braemar ducted gas heating models in this brochure have been independently tested in the Australian Gas Association (AGA) NATA accredited testing laboratory.

What is the highest star rating you can buy?

For ducted gas heaters, the star rating system has a minimum of 1 star and a maximum of 6 stars.

Australian Standard AS/NZS5263.1.6:2016 sets out how to calculate the efficiency rating for Energy Labelling of Ducted Gas Heaters. The Standard states that the result of the calculation is to be rounded down to a maximum of 6.0 stars.

Therefore, even if a heater is more efficient, the Standard does not provide for certification of an energy efficient star rating that is higher than 6.0 stars.

However, using the same system, we can calculate the "star rating equivalent", which will show equivalent ratings of more than 6 stars.

Star ratings explained

In Australia, there is an Energy Rating Labelling scheme to help customers choose energy efficient appliances.

The labels display a star rating for energy efficiency and annual energy consumption in MJ/m³ per year—the higher the number of stars, and the lower the energy consumption, the more efficient the appliance, meaning greater annual savings on your running costs.

On average an increase of one star means an average usage saving of approximately 10 percent.

Why choose a Climate Masters of Seeley International specialist?

Members^ of Climate Masters of Seeley International are heating and cooling experts, and provide a level of service you won't get anywhere else.

-  Unsurpassed professionalism and expertise
-  Unrivalled quality service
-  Aftercare that really delivers
-  Reliability
-  Exclusive Supernova™ 3 & 4 star range

Ducted Gas Heating Star Ratings Made Easy!

How do I know I'm getting the most efficient brand?

Let's compare the brands...

Braemar has achieved the highest star rating in every category!

*Based on Australian Gas Association's calculated tests.

3 Star

At 3.9 stars

the Braemar Super-Three TQS3 range of ducted gas heaters have the highest star rating in the 3 star category.

4 Star

At 4.9 stars

the Braemar Super-Four TQS4 range of ducted gas heaters have the highest star rating in the 4 star category.

5 Star and non-condensing

At 5.9 stars

the Braemar Super-Five TQS5 range of ducted gas heaters have the highest star rating in the 5 star category.

6 Star*

At 6.8 star equivalent efficiency rating*

the Braemar Super-Six TQS6 range of ducted gas heaters have the highest star rating equivalent in the 6 star category.

7 Star*

At 7.0 star equivalent efficiency rating*

the TQS7 range is the only 7 star rating equivalent* on the market, with the highest star rating equivalent of any ducted gas heater.

*Star rating equivalent. Based on Australian Gas Association's calculated tests.
