

Leading edge  
**Add-on cooling**  
for ducted gas heating

*“Seeley International never stops striving to innovate and build the world’s most energy efficient heaters and air conditioners.*

*It is this commitment to excellence that’s at the heart of everything we do.”*

Frank Seeley AM FAICD  
Founder and Executive Chairman

## The award winning company

Seeley International consistently wins awards each year for new product design, innovation and the environment.

Recent awards include:

sydney  
design  
awards

melbourne  
design  
awards

# The natural choice for **comfort in all conditions**

## **ADD-ON COOLING SYSTEMS**

The ideal solution for whole of home comfort, complementing a new or existing Braemar ducted gas heating system.

Add-on cooling systems utilise existing Braemar ducted gas heating ductwork and grilles and consist of an indoor unit (placed within the roof space), an outdoor unit and one controller for heating and cooling, with zoning option available\*.

# The Braemar difference

## COST EFFECTIVE

MEPS (Minimum Energy Performance Standards) compliant

DRED (Demand Response Enabling Device) feature (on Invertair™ models)

## AUSTRALIAN OWNED

Seeley International, Australia's leading cooling and heating manufacturer

## RANGE

Braemar offers a comprehensive range to suit everyone's needs

## QUALITY

65 year history of Braemar excellence and reliability

Leading technology and innovation come as standard

## WARRANTY

Quality that lasts – 5 year comprehensive manufacturer's warranty

A network of highly professional dealers and service agents throughout Australia

## ENVIRONMENT

The add-on cooling range uses eco-friendly R410A refrigerant

# Standard features

## The DC inverter technology difference

All Braemar Invertair™ add-on cooling systems feature DC inverter technology.

An inverter is a power conversion circuit that electronically regulates the voltage, current and frequency of an air conditioner. This circuit controls the compressor, outdoor and indoor fans, maximising the air conditioner's efficiency.

Compared to conventional models, inverter air conditioners provide:

Quicker and finer temperature control and comfort

Significantly lower running costs

Elimination of temperature fluctuations

Wider operating temperatures

Greatly reduced system noise inside and outside the home

## DC inverter technology vs. conventional

Table for illustration purposes only.

## DRED as standard

With the introduction of smart power meters (PeakSmart in QLD), the electrical supply authority can limit the amount of power to the property at certain times during extreme weather conditions, when the power supply is at peak demand, using DRED (Demand Response Enabling Device).

In some states, the power supply authorities offer financial incentives to consumers who install DRED enabled air conditioning systems. **All of Braemar's latest inverter products now come with DRED as standard.**

# Add-on cooling for gas heating

## The ideal solution for whole of home comfort

Add-on cooling systems are specifically designed to complement a new or existing<sup>^</sup> Braemar ducted gas heating system. Compact and economical to run, it can be installed at the same time as a heating system, or added later.

<sup>^</sup>Applicable to installations where airflow requirements and duct design are suitable. Not all models of Braemar ducted gas heaters are suitable for add-on cooling, so please check with the dealer.

# Invertair™

## Indoor units – Australia's first and only true inverter add-on cooling system

The inverter technology in **Invertair™ add-on cooling** ensures uninterrupted comfort and a significant saving in running costs.

### POWER SAVING

High energy efficiency results in significant savings in running costs.

### LOW PROFILE DESIGN

Visually appealing with a discrete and low profile design that can be concealed above ceilings or below the floor to deliver conditioned air via ducting and suitable ceiling or floor grilles.

### EFFICIENT AND QUIET

Inverter technology, 1W standby mode and automatic fan adjustment as the evening temperature drops all make for best efficiency and the quietest operation.

### EASY AND FLEXIBLE INSTALLATION

Compact and suitable for installation in almost all roof cavities. Room positioning and grille options allow for flexible installation choices.

**Note:** the Invertair™ series can only be installed with the TQ heater and MagIQtouch controller. Available in 4 sizes.

# Invertair™

## Outdoor units

### FLEXIBLE OUTDOOR PLACEMENT

Long pipe runs of up to 50m allows flexibility in placing an outdoor unit.

### SLIM DESIGN

Allows more flexibility in placing an outdoor unit.

### QUICK AND EASY INSTALLATION

Single drain connection point allows for quick and easy installation.

# SACC series

## Fixed speed add-on cooling – Indoor units

Enjoy exceptional comfort without the worry of high energy costs with a quality **fixed speed add-on cooling system**.

### POWER SAVING

High energy efficiency results in significant savings in running costs.

### EFFICIENT AND QUIET

Inverter technology, 1W standby mode and automatic fan adjustment as the evening temperature drops all make for best efficiency and the quietest operation.

### LARGE CAPACITY UNITS

The larger units are the largest capacity available in the nation and ideal for large homes and open spaces.

### LOW PROFILE DESIGN

Visually appealing with a discrete and low profile design that can be concealed above suspended ceilings or within open closet spaces to deliver conditioned air via ducting and suitable ceiling or wall grilles.

### EASY AND FLEXIBLE INSTALLATION

Compact and suitable for installation in almost all roof cavities. Room positioning and grille options allow for flexible installation choices.

Available in 7 sizes.

# SACC series

## Fixed speed add-on cooling – Outdoor units

### FLEXIBLE OUTDOOR PLACEMENT

Long pipe runs of up to 50m allows flexibility in placing an outdoor unit.

### EFFICIENT AND QUIET

Automatic fan speed adjustment as the evening temperature drops makes for best efficiency and the quietest operation.

### LONG LIFE UNIT PROTECTION

Cabinet is made of high quality galvanised steel and powder-coated with high quality epoxy paint for long life and extra strength. Pre-coated aluminium fins provide resistance against corrosion.

# Innovative MAGIQTOUCH<sup>®</sup> controller

## Touch screen technology

Smart, sophisticated and incredibly intuitive, the MagIQtouch controller makes operating a Braemar so simple. Discreet and modern design will blend seamlessly into the décor of any home.

### Touch screen

Easy to use intuitive touch screen control.

### Heat or cool with one touch

With one simple touch, turn the heater or cooler on or off.

### Zone the home

Switch between zones in the home and control the heating settings in each zone. Save on running costs by switching zones off.<sup>◊</sup>  
Zoning is an optional extra

### Target temperature

Displays the temperature to be reached.

### Switch to heating or cooling

Quickly switch to heating. Display turns blue when cooling and red when heating.

### Current temperature

Quickly and easily view the current temperature inside the home.

### Temperature control

Tap the minus to reduce target temperature or plus to increase target temperature.

### Wake up

Press to wake the controller from sleep, only lighting up the screen when in use.

### Settings

Access features such as child lock, night quiet mode<sup>◊</sup> and servicing information.

### Program mode

Tap to change the 7 day program with 4 simple time periods (including a temporary over-ride function).

<sup>◊</sup>TQ3 and TQD3 models: night quiet mode and zoning is not available, and fan speed is not user-adjustable.

# Invertair™
