SEELEY 
INTERNATIONAL

Frank Seeley AM FAICD

Founder and Executive Chairman.

Seeley International is Australia's largest and most awarded air conditioning manufacturer with a history spanning more than 40 years.

Renowned for ingenuity and innovation, Seeley International leads the market in the design and manufacture of heating and cooling systems, with award winning brand names including Breezair, Braemar, Climate Wizard, Convair, Coolair, Coolerado and Aira.

With factories in Adelaide, South Australia and Albury, New South Wales, when you buy a Seeley International product you can be confident you're investing in a quality, Australian made climate control solution^.

Seeley International never stops striving to engineer and build the world's most energy efficient heaters and coolers. It is this commitment to excellence that's at the heart of everything we do.

^For Breezair, the product range is made in Australia.
For Braemar, the evaporative and gas heating product ranges are made in Australia. The inverter add-on cooling product range is assembled in Australia.
For Climate Wizard, the product range is made in Australia.
For Convair, the evaporative product range is made in Australia.
For Coolair, the product range is made in Australia.
For Braemar Tudor Romeo, the product range is made in Australia.
For Coolerado, the product range is made/assembled in the US.
For Aira, the product range is made in Australia.

Award Winning Company

Seeley International consistently wins awards each year for new product design, innovation and the environment.

Recent awards include:

Coolair... Australia's greatest value-for-money home cooling!

Natural cooling

Coolair evaporative air conditioning is wonderfully simple – which is why it works so well. Basically, hot outside air is drawn through a water saturated Chillcel® filter.

The evaporation process removes heat and produces a large continuous stream of comfortably cool, clean, fresh air... nothing could be more natural.

Air within your home is cooled and completely replaced every few minutes - so it is always Coolair fresh.

Coolair also combats unwanted airborne dust and pollen from entering your home, making it gentler on the eyes, nose and skin. That's why Coolair ducted air conditioning is just like a breath of cool, fresh air in your home. If you enjoy outdoor entertaining, have a busy family, or just prefer the pleasures of indoor-outdoor living, then there is no better basic choice than Coolair ducted evaporative air conditioning.

Why choose Coolair?

- ✓ Quiet whole-of-home cooling
- ✓ Incredibly low running costs
- ✓ Improved cooling performance
- ✓ Touch screen controller available as an upgrade

Coolair is a perfect natural cooling solution for Australian homes.

Coolair ducted evaporative cooling

Features and benefits

Non clogging water distribution system

Coolair's unique patented distribution system means no clogging and no dry spots on the filter pads.

- Clever high efficiency pad wetting system
- Total pad saturation for total cooling
- High performance cooling day and night

High performance Chillcel® pads

- Durable cooling pad design
- Exceptionally fast moisture absorption
- High water flow and excellent dust-trap properties
- Ensuring quick, clean, high performance cooling

Stealth® fan

- Advanced aerodynamic design
- Super quiet in operation
- Produces a constant, cool, quiet, refreshing breeze at a fraction of alternative running costs

Powerful Tornado® pump

- Australian designed and manufactured
- Built to outlast other less efficient conventional style pumps

Australian made

- Manufactured by Seeley International
- 40 years history of excellence
- Built in Australia to withstand the harshest climates

Auto Weather Seal system

- Automatically closes off the air conditioning ducts when not in use
- Reduces winter chills entering your home
- Ensures comfort all year round

Built to last rooftop cabinet

- Visually discreet, low profile
- Integrates unobtrusively with the roof line
- High performance Permatuf® polymer construction
- Highly durable, will not corrode or rust
- Available in a range of contemporary colours

Looking for a combined cooling and heating solution?

Seeley International's range of products also includes ducted gas heating that can complement your evaporative cooling system. Take advantage of controlling your cooling and heating system from the same controller – the innovative touch screen **MagIQtouch Controller**. Ask your dealer for the right solution for your home.

Electronic smart-control system

- Manages the whole-of-home system with reliable precision
- Smart, reliable and durable – just set and forget!

Optional Clean & Dry function

- Reduce the need for seasonal maintenance with this optional feature
- This clever device conserves water by retaining the system's water for up to 72 hours of non-operation
- If the system is not used for 72 hours, Clean & Dry will release its load as garden friendly grey water, preventing ongoing algae growth

Flexible control with MagIQcool

The Coolair MagIQcool Controller is incredibly easy to use.

- Set your preferred temperature level on the clever wall mounted control and Coolair will do the rest - quickly, cleanly, reliably
- Maintain your desired comfort level with four convenient modes to choose from - cool, vent, auto & timer

Optional Extra: MagIQtouch Controller

Upgrade to the MagIQtouch Controller with advanced features of touch screen technology.

Simply download QR Code Reader/Scanner from the iTunes store or Google Play store. Scan the code and experience the MagIQtouch

Industry leading warranty and quality control standards

For complete peace of mind, Coolair backs every one of its air conditioning systems with an industry leading comprehensive warranty program.

This includes a comprehensive 7 year warranty* (with a compulsory chargeable service in the fourth year), 10 year cover on all structural components, plus a hefty 25 year cover against corrosion, on its Permatuf® cabinets.

Please refer to your home owner's manual at coolair.com.au for all service and warranty terms and conditions.

*The 7 year comprehensive warranty is available exclusively (i.e. only) from Seeley International participating dealers. The warranty has terms and conditions, including the requirement for servicing of the product in accordance with the owner's manual. In the fourth year the service must be performed by Seeley International or its appointed nominee.

Save with Coolair

When it comes to running efficiency, comfort levels, quiet cooling power and value-for-money whole-of-home ducted air conditioning, Coolair stands alone with big savings.

This is especially true when comparing Coolair evaporative air conditioning against reverse cycle systems.

What's more, evaporative air conditioning can achieve the same comfort level at less than 20% of the running costs typically associated with a refrigerated system.*

Add to this, the massive purchase savings of evaporative over refrigerated air conditioning, and it's very easy to see why Coolair comes out way in front.

Running costs for whole-of-home air conditioning*

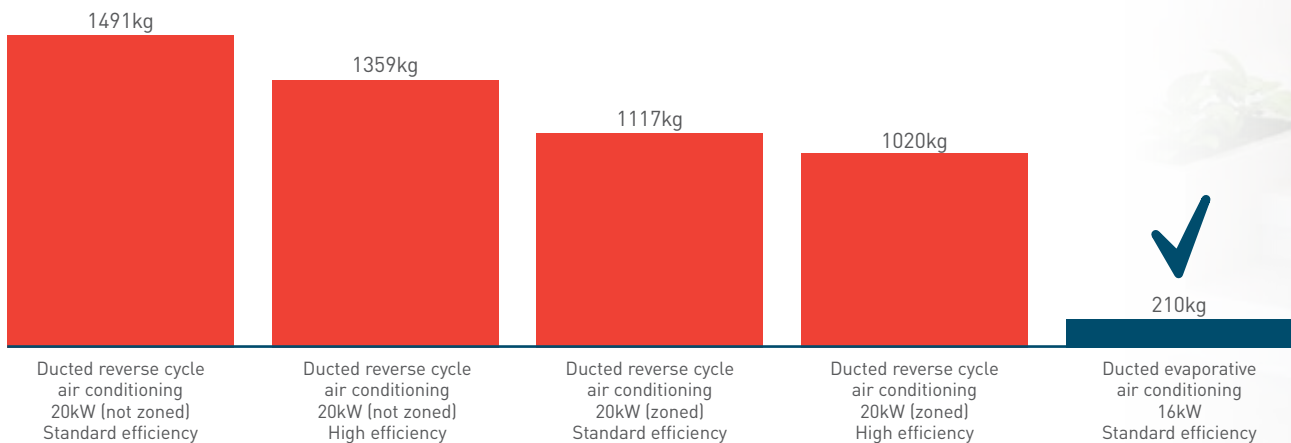

*Based on approximate running cost figures per annum sourced from Sustainability Victoria – see its Cooling Fact Sheet at www.sustainability.vic.gov.au/services-and-advice/households/energy-efficiency/toolbox/energy-efficiency-fact-sheets. Assumes a whole house area of 166 square metres, with 300 hours usage, a 60% duty cycle for air conditioners, and an electricity tariff of 28 cents/kWh. No brand names are mentioned in the Sheet. Note that evaporative coolers also use water.

Better for the environment

Evaporative air conditioning is so efficient it produces less than one seventh of the CO₂ emissions compared to a 20 kW ducted reverse cycle system.

By choosing Coolair, you can help reduce the amount of harmful greenhouse emissions entering our environment.

CO₂ emissions for whole of home air conditioning (kg/yr)*

^ Seeley International's calculations, based on publicly available data (2008). CO₂ emissions based on 1.09 kg CO₂ e/kWhr electricity purchased from grid for Victoria. Data sourced from Part 6 of Schedule 1 to the National Greenhouse and Energy Reporting (Measurement) Determination 2008 (Compilation No. 7, dated 1 July 2016).
